

FAMI-QS / EUROPEAN FEED ADDITIVES AND PREMIXTURES  
QUALITY SYSTEM

**Note of clarification regarding reciprocal recognition between FAMI-QS and UFAS/FEMAS certificates**

After a very active period of dialogue between AIC Services (UK) and FAMI-QS Asbl, both organizations want to clarify and settle the well established co-operation between FAMI-QS and UFAS / FEMAS, which pursue similar safety aims.

It is established that the UFAS and FEMAS systems accept as a secured source the material coming from the operators (producers and suppliers in general of feed additives and premixtures) who hold a FAMI-QS certificate delivered within the scope of this system. These two systems do not require from these FAMI-QS certified operators any other formality or step than the proof they are holding a valid certificate in order to consider them as “assured supplies”.

As a matter of reciprocity, FAMI-QS system accepts as a secured source the incoming materials from operators certified under UFAS or FEMAS systems (feed additives and premixtures, including those coming from FEMAS intermediate suppliers). FAMI-QS do not require from UFAS / FEMAS certified operators any other formality or step than the proof they are holding a valid certificate in order to consider them as “assured supplies”.
