

July 2006: FAMI-QS training session for auditors in Beijing

With the aim to guarantee an optimum level of knowledge of its auditors and maintain the quality and excellence of the system, FAMI-QS provides periodical ongoing technical training to its partners, Certification Bodies.

During the last months, the interest of FAMI-QS has increased considerably in non-EU countries. The Chinese feed additives and premixtures industry has especially welcomed the FAMI-QS system, as it represents a very useful tool for this market to comply with European Regulations when putting its products in the EU market. Furthermore, FAMI-QS is the key for EU importers to make sure their third countries suppliers comply with the requirements of safety and quality established in the Code of Practice.

Because of this very high interest, Elsa Vecino (Quality Manager of FAMI-QS) and Matthew Russell (member of the Board) traveled to Beijing to bring Chinese auditors a 16 hours training session on EU legislation, the FAMI-QS Code of Practice and its application. At the end of the session, the auditors were submitted to an examination to evaluate its level of understanding on the

subjects. The results were more than satisfactory, and the auditors showed to be well prepared to provide FAMI-QS audit and certification to the Chinese feed additives and premixtures industry.

FAMI-QS celebrates the success of this meeting, who has allowed among others to establish the basis of this quality system in China and provide certification in this country under the best quality guarantees.
